

Poster Guideline

Font

- This guideline is for a A0 (841mm x 1189mm) poster, for different sizes, adapt the font size
- Most importantly your poster should be well readable, even from a distance, e.g. 5 meters
- We recommend a title font size around 60-72
- For the main text we recommend a font size around 40-48
- *Don't get creative with your font type*
- Your font type should be easy to read
- Don't vary too much in font size in between sections

The Title

- The title should be short, at best a single line, but never more than two
- Leave the rest of a long title for an abstract/summary

Content

- Divide your poster in sections, as you would in a paper/report and give those a title
- Try having sections of roughly equal size
- Give the sections a logical order such that the reader does not have to 'jump around'
- Provide relevant background but keep it short
- Do not use large blocks of text
- Use figures to visualize your content
- Provide a caption for your figures
- Keep it simple, the readers should not take longer than 3-5 minutes to read your poster
- Show your references

Who contributed?

- Put your name and names of collaborators on the poster
- state your affiliation of available

Design

- use colors, they can highlight important parts and draw the readers attention
- However, do not use too many different colors
- Leave some space at the borders both for the sake of appearance and to allow easily putting up your poster in a frame etc
- A nice background can make the poster more interesting

Examples

On the next slides, we provide some example layouts for your inspiration.

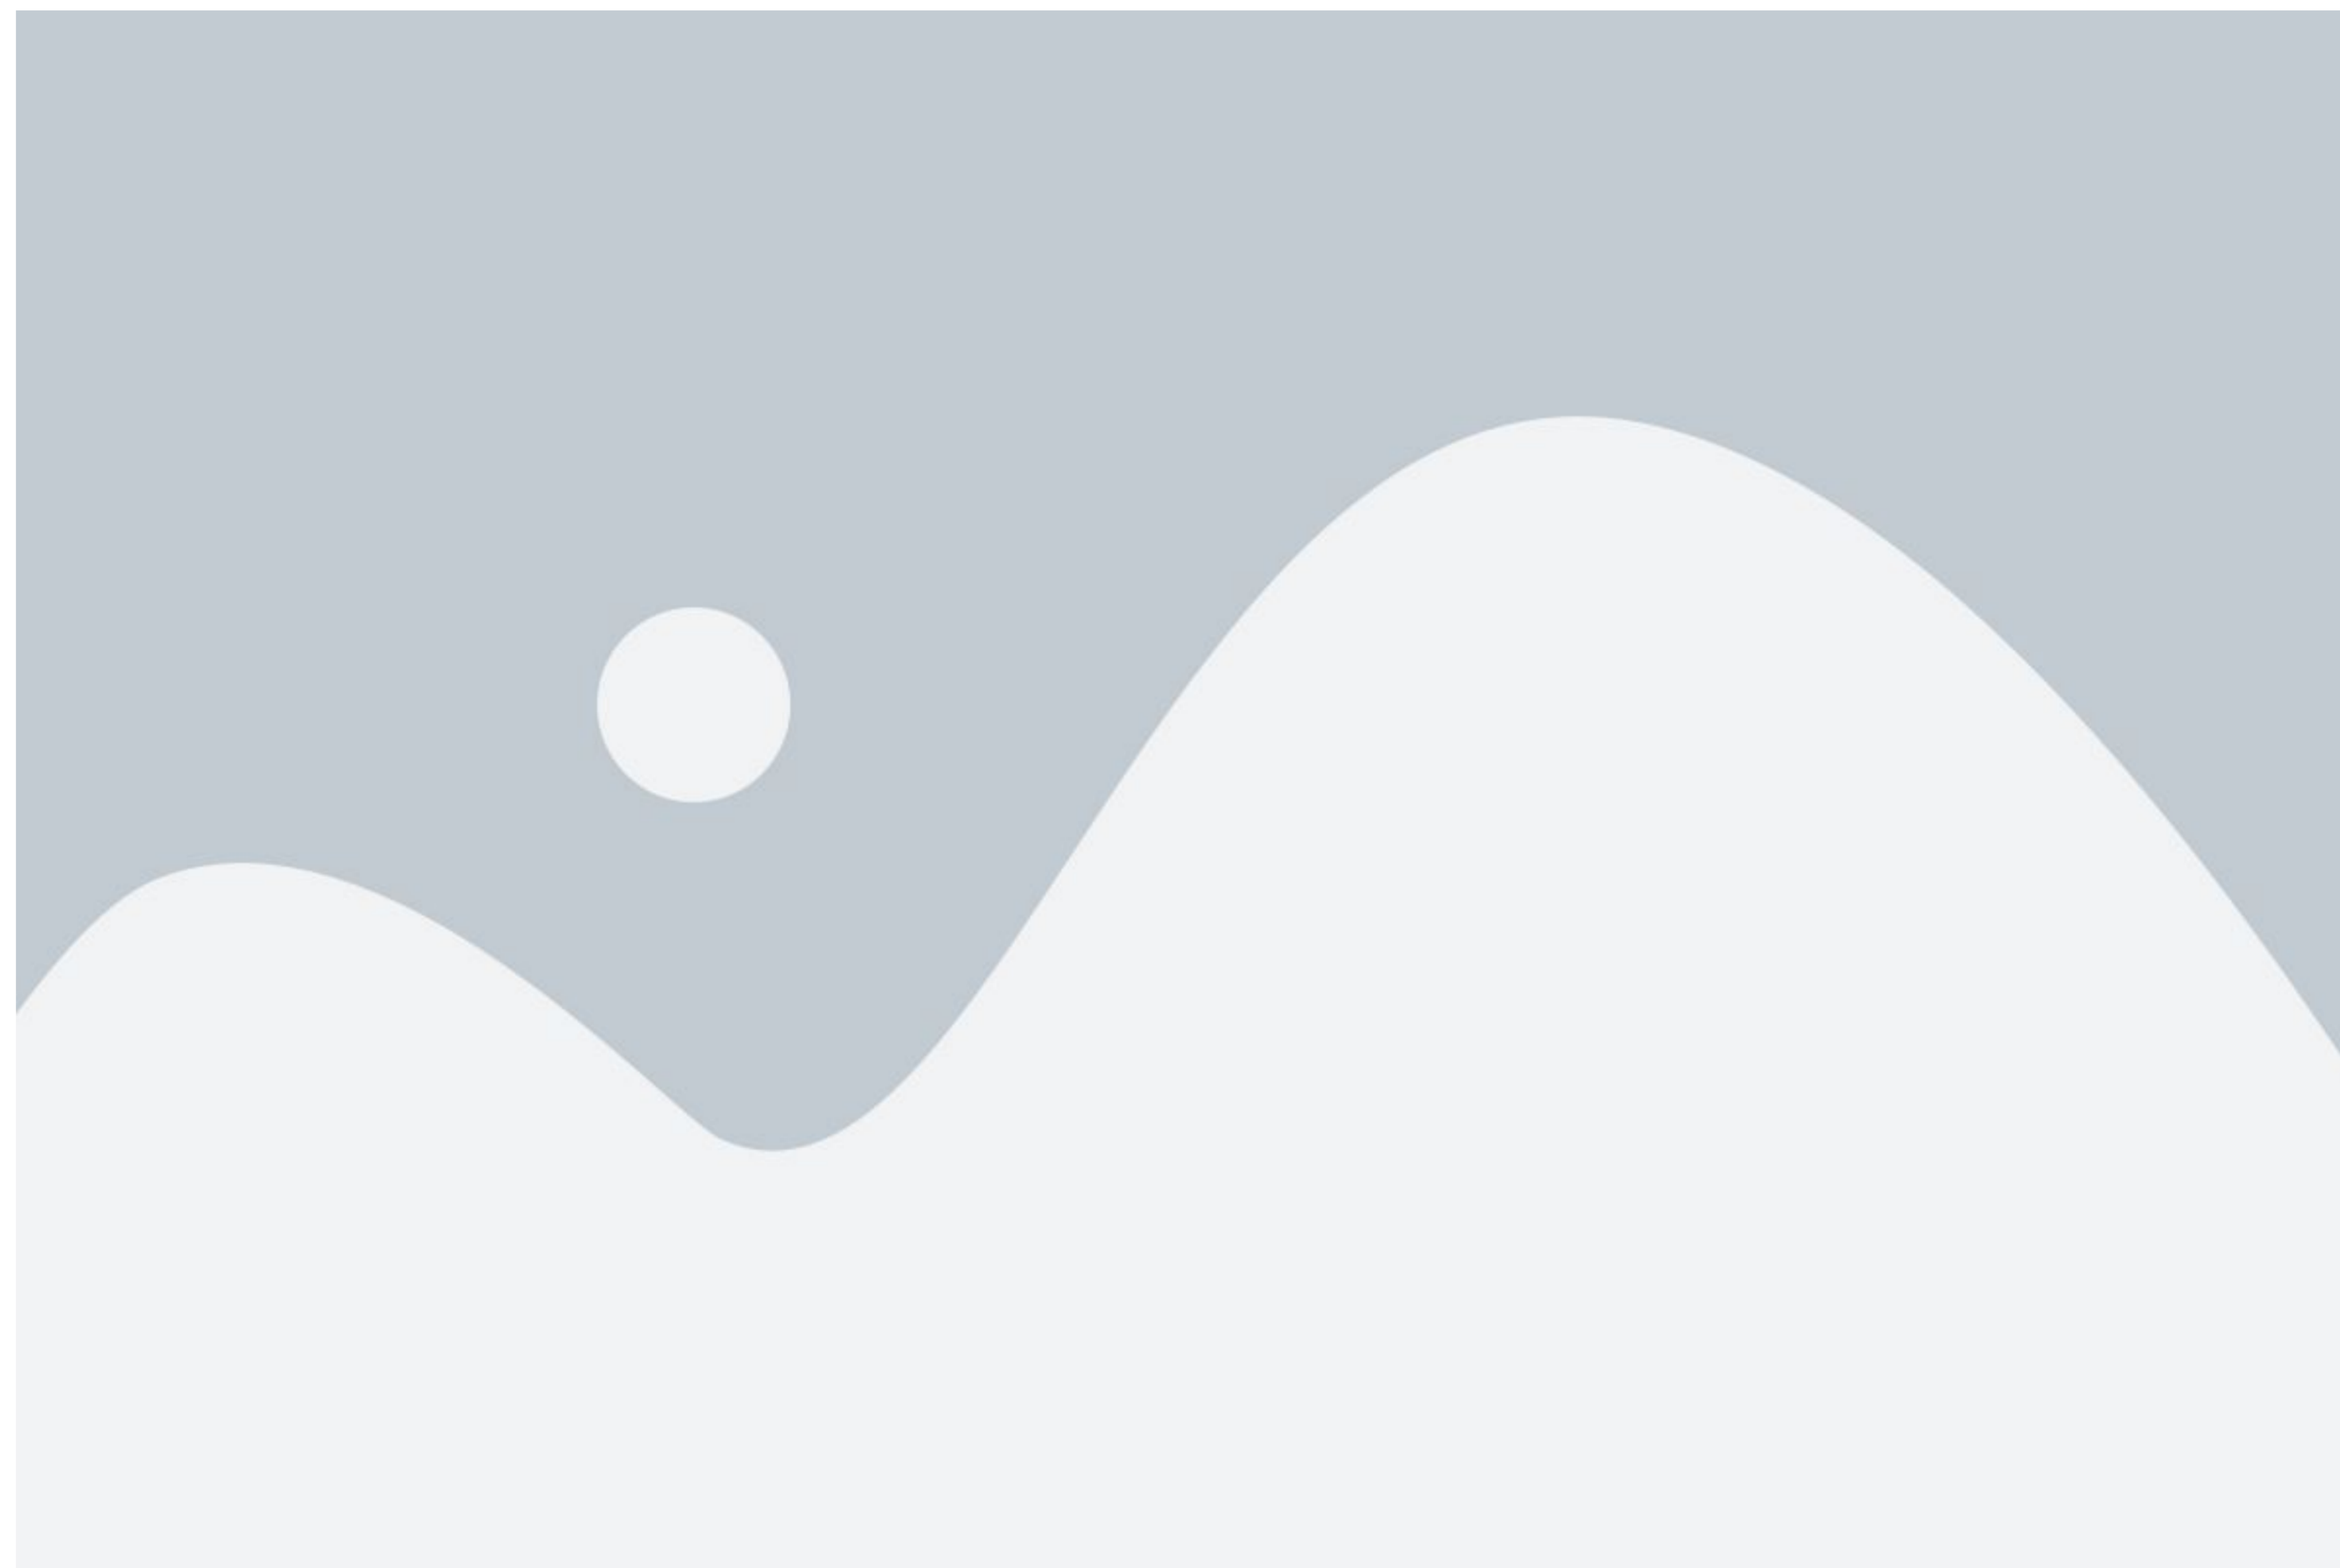

Those are not templates which you have to follow, feel free to design your own poster!

Note, that the posters do use large blocks of text as a visualization, do NOT use large blocks of text in your poster.
